October 9, 2009

Where: Buzbee Dental

Lost & Found
Mending the Hearts
of Grieving Children and Families

Traveling Photo Exhibit: Mending of Hearts

Buzbee Dental proudly supports Lost & Found's traveling photo exhibit. Beginning the week of September 21, we're displaying 31 portraits of the Mending of Hearts photo exhibit. Photos by Randy Bacon. The public is welcome to stop by Buzbee Dental and request to walk through the exhibit.

After debuting at the 2009 August and September Art Walk at the Randy Bacon Gallery, the Mending of Hearts exhibit has now transitioned into a traveling photo exhibit to be displayed in businesses throughout the community in an effort to

ensure that families know about the available free support services offered at Lost & Found. Lost & Found provides free services to grieving families from a 15-county area.

Call Lost & Found at 865-9998 and ask for a traveling photo exhibit application if your place of business is interested in participating in spreading the word about Lost & Found.

Over 40 families receiving free grief support services from Lost & Found participated in a photo exhibit to share their stories on the journey of grief. The Lost & Found support groups met in the Randy Bacon Studio sharing their experiences as a part of a community of grieving families and receiving encouragement from one another. Each family took part in a professional photo session taken by recognized photographer Randy Bacon with some families including pictures or mementoes of their loved one. The photo exhibition shares the stories from each family.

Buzbee Dental offers a multidisciplinary approach to preventive and cosmetic dentistry using advanced technology. A general family dental practice owned and family operated by the Buzbee doctors: Gary, Roger, Todd and Tyler.
